Telpro Inc. Reduces the Pain and Fatigue Associated With Overhead Drilling into Concrete

Introducing the DrillRite™ Overhead Concrete Drill Press by Telpro Inc.

Grand Forks, ND—12/30/2011—Telpro Inc. has developed the **DrillRite™ Overhead Concrete Drill Press** to make life safer and easier for workers drilling overhead into concrete.

The DrillRite™ Overhead Concrete Drill Press by Telpro Inc. is the culmination of a five-year research project begun by researchers at the University of California, San Francisco, and UC Berkeley. Telpro Inc., with its 40 history in manufacturing tools and equipment for the construction trades, has taken the project forward from the USCF research process and designed a commercially practical version of the equipment.

Telpro Inc.'s new DrillRite™ Overhead Concrete Drill Press adds multiple unique patent pending features including an integrated vacuum dust extraction system to capture dangerous airborne silica dust produced by the drilling process. The DrillRite™ Overhead Concrete Drill Press reduces work site fall hazards by allowing workers to drill safely from the ground and it greatly reduces musculoskeletal strain when compared to the old method of overhead drilling.

The DrillRite™ Overhead Concrete Drill Press by Telpro Inc. is made in the USA, will adapt to hold a wide variety of popular rotary hammer drills used for drilling overhead into concrete, reaches up to 12' ceilings and is adaptable to platform and scissor lifts for higher ceilings.

Additional information on the DrillRite™ Overhead Concrete Drill Press by Telpro Inc. can be found at <http://www.drillriteusa.com>.

About Telpro Inc.®

Since 1973, Telpro Inc. has provided high value U.S. made proprietary and custom designed lifting, handling and personnel access solutions to a wide range of industries and specialty trades including construction, HVAC, drywall, electrical, equipment rental, nuclear power plants, aerospace, defense, wind energy manufacturers, mass transit authorities, US Navy, US Air Force, automotive manufacturers, the hospitality industry, convention/exhibit halls and entertainment venues just to name a few.

Telpro Inc.'s branded lines of equipment include PANELLIFT® Drywall Lifts, Tele-Tower® Adjustable Work Platforms, Doorminator® Door Handlers, Cabinetizer® Material Lifts and the DrillRite™ Overhead Concrete Drill Press. <http://www.telproinc.com>
